Hello, I build single-pager functional component-based React UI applications . I am relying on JWT for USER authentication/authorization. I use the node.js server on the Back End and deploy this to Heroku/ AWS EC2/ Cyclic / Render . I use MongoDB to store data on the database and find them on the client side using Axios /fetch method through REST API .

WORK EXPERIENCE

React & Node Frontend Developer Programming Hero

04/2022 - 11/2022

Dhaka(Remote)

Achievements/Tasks

- Building re-usable functional components, Used authoring or scripting languages and content creation tools to design, build and maintain websites, Building optimized component, Creating new components from design sketch - Figma, Adobe XD
